

## Year 4 Maths Overview

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10	Week 11	Week 12	Week 13
Autumn	<b>Unit 1</b> Review of column addition and subtraction			<b>Unit 2</b> Numbers to 10,000/ Place value			<b>Unit 2</b>		<b>Unit 3</b> Perimeter	<b>Unit 4</b> 3, 6, 9 times tables			
Spring	<b>Unit 4</b>		<b>Unit 5</b> 7 times tables and patterns		<b>Unit 6</b>	<b>Unit 6</b> Understanding and manipulating multiplicative relationships				<b>Unit 7</b> Coordinates			
Summer	<b>Unit 7</b> Coordinates	<b>Unit 8</b> Review of fractions	<b>Unit 9</b> Fractions greater than 1			<b>Unit 9</b>	<b>Unit 10</b> Symmetry in 2D shapes	<b>Unit 11</b> Time	<b>Unit 12</b> Division with remainders				

Number	Measurement	Geometry	Statistics
--------	-------------	----------	------------

Statistics taught throughout the curriculum and through cross curricular links.

Time is also covered during Fluent in Five

# Year 4 maths curriculum map

COVID Recovery Curriculum

NCETM prioritisation curriculum/ NCETM spines/ White Rose SOL/ DFE Ready to Progress criteria have all been used to support the planning, teaching and learning of mathematics.

Rough suggestions are given for the intended length of each unit, but teachers are expected to adjust according to the needs and prior learning of their pupils.

Unit	Unit name	Learning outcomes	Links with other resources
1 (3 weeks)	<b>Addition and Subtraction</b>  <b>NCETM prioritisation unit 1</b>	<p><b>Review of column addition and subtraction</b></p> <ol style="list-style-type: none"> <li>1) Pupils identify the addends and the sum in column addition</li> <li>2) Pupils use their knowledge of place value to correctly lay out column addition</li> <li>3) Pupils add a pair of 2-digit numbers using column addition</li> <li>4) Pupils add using column addition</li> <li>5) Pupils use their knowledge of column addition to solve problems</li> <li>6) Pupils add a pair of 2-digit numbers using column addition with regrouping in the ones column</li> <li>7) Pupils add a pair of 2-digit numbers using column addition with regrouping in the tens column</li> <li>8) Pupils add using column addition with regrouping</li> <li>9) Pupils use known facts and strategies to accurately and efficiently calculate and check column addition</li> <li>10) Pupils use their knowledge of column addition to solve problems</li> <li>11) Pupils identify the minuend and the subtrahend in column subtraction</li> <li>12) Pupils subtract using column subtraction</li> <li>13) Pupils subtract from a 2-digit number using column subtraction with exchanging from tens to ones</li> <li>14) Pupils subtract from a 3-digit number using column subtraction with exchanging from hundreds to tens (1)</li> <li>15) Pupils subtract from a 3-digit number using a column subtraction with exchanging from hundreds to tens (2)</li> <li>16) Pupils evaluate the efficiency of strategies for subtraction</li> </ol> <p><a href="https://www.ncetm.org.uk/classroom-resources/cp-year-4-unit-1-review-of-column-addition-and-subtraction/">https://www.ncetm.org.uk/classroom-resources/cp-year-4-unit-1-review-of-column-addition-and-subtraction/</a></p>	<p>3AS–2 Add and subtract up to three-digit numbers using columnar methods.</p> <p>1.20 Algorithms: column addition</p> <p>1.21 Algorithms: column subtraction</p> <p><a href="#">White Rose – Addition and subtraction unit</a></p>

<p>2 (</p>	<p><b>Numbers up to 10,000</b></p> <p><b>NCETM prioritisation unit 2 and White Rose</b></p>	<ol style="list-style-type: none"> <li>1) Pupils explain how many tens, hundreds and ones 1,000 is composed of</li> <li>2) Pupils use knowledge of 1,000 to explain common measure conversions</li> <li>3) Pupils use knowledge of 1,000 to solve problems</li> <li>4) Pupils use different strategies to add multiples of 100</li> <li>5) Pupils use different strategies to subtract multiples of 100</li> <li>6) Pupils use knowledge of calculation and common measure conversions to solve problems</li> <li>7) Pupils compose and decompose four-digit numbers in different ways</li> <li>8) Pupils use strategies to make solving calculations more efficient</li> <li>9) Pupils compare and order four-digit numbers</li> <li>10) Pupils calculate efficiently by using knowledge of place value, addition and subtraction</li> <li>11) Pupils explain what rounding is</li> <li>12) Pupils round a four-digit number to the nearest thousand</li> <li>13) Pupils round a four-digit number to the nearest hundred and ten</li> <li>14) Pupils round a four-digit number to the nearest thousand, hundred and ten</li> <li>15) Pupils add up to 3 four-digit numbers using a column addition</li> <li>16) Pupils subtract four-digit numbers using a column subtraction</li> <li>17) Pupils use strategies to make solving calculations more efficient</li> <li>18) Pupils explain how many '100s' and '200s', 1,000 is composed of</li> <li>19) Pupils explain how many '500s' and '250s', 1,000 is composed of</li> </ol> <p><a href="https://www.ncetm.org.uk/classroom-resources/cp-year-4-unit-2-numbers-to-10-000/">https://www.ncetm.org.uk/classroom-resources/cp-year-4-unit-2-numbers-to-10-000/</a></p>	<p>4NPV-1 Know that 10 hundreds are equivalent to 1 thousand, and that 1,000 is 10 times the size of 100; apply this to identify and work out how many 100s there are in other four-digit multiples of 100.</p> <p>4NPV-2 Recognise the place value of each digit in four-digit numbers, and compose and decompose four-digit numbers using standard and non-standard partitioning.</p> <p>4NPV-3 Reason about the location of any four-digit number in the linear number system, including identifying the previous and next multiple of 1,000 and 100, and rounding to the nearest of each.</p> <p>4NPV-4 Divide 1,000 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in multiples of 1,000 with 2, 4, 5 and 10 equal parts.</p> <p>4NF-3 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 100).</p> <p>1.22 Composition and calculation: 1,000 and four-digit numbers</p> <p><a href="#">White Rose – Place Value unit</a></p>
<p>3 (3 weeks)</p>	<p><b>Perimeter</b></p> <p><b>NCETM prioritisation unit 3</b></p>	<ol style="list-style-type: none"> <li>1) A regular polygon has sides that are all the same length and interior angles that are all equal in size</li> <li>2) Perimeter is the distance around the edge of a two-dimensional shape</li> <li>3) Different shapes can have the same perimeter</li> <li>4) Perimeter is measured in units of length and can be found by counting units</li> <li>5) Perimeter can be calculated by adding together the side lengths of a 2D shape</li> <li>6) The perimeter of a rectangle can be calculated by addition and multiplication</li> <li>7) Unknown side lengths can be calculated from perimeter and known side lengths</li> <li>8) The perimeter of a regular polygon can be calculated by multiplication</li> <li>9) The side length of a regular polygon can be calculated by division where the perimeter is known</li> </ol>	<p>4G-2 Identify regular polygons, including equilateral triangles and squares, as those in which the side-lengths are equal and the angles are equal. Find the perimeter of regular and irregular polygons.</p> <p>2.16 Multiplicative contexts: area and perimeter</p> <p>1 White Rose – unit</p> <p><a href="#">White Rose – Length and perimeter unit</a></p>

<p>4 (6 weeks)</p>	<p><b>3, 6, 9 times tables</b></p> <p><b>NCETM</b> <b>Prioritisation unit 4</b> <b>and White Rose</b></p>	<ol style="list-style-type: none"> <li>1) Pupils represent counting in threes as the three times table</li> <li>2) Pupils explain the relationship between adjacent multiples of three</li> <li>3) Pupils use knowledge of the three times table to solve problems</li> <li>4) Pupils represent counting in sixes as the six times table</li> <li>5) Pupils explain the relationship between adjacent multiples of six</li> <li>6) Pupils use knowledge of the six times table to solve problems</li> <li>7) Pupils use known facts from the five times table to solve problems involving the six times table</li> <li>8) Pupils explain the relationship between multiples of three and multiples of six</li> <li>9) Pupils use knowledge of the relationships between the three and six times tables to solve problems</li> <li>10) Pupils represent counting in nines as the nine times table</li> <li>11) Pupils explain the relationship between adjacent multiples of nine (1)</li> <li>12) Pupils explain the relationship between adjacent multiples of nine (2)</li> <li>13) Pupils use known facts from the ten times table to solve problems involving the nine times table</li> <li>14) Pupils explain the relationship between multiples of three and multiples of nine</li> <li>15) Pupils explain the relationship between pairs of three and nine times table facts that have the same product (1)</li> <li>16) Pupils explain the relationship between pairs of three and nine times table facts that have the same product (2)</li> <li>17) Pupils use the divisibility rules for divisors of three</li> <li>18) Pupils use the divisibility rules for divisors of six (1)</li> <li>19) Pupils use the divisibility rules for divisors of six (2)</li> </ol> <p><a href="https://www.ncetm.org.uk/classroom-resources/cp-year-4-unit-4-3-6-9-times-tables/">https://www.ncetm.org.uk/classroom-resources/cp-year-4-unit-4-3-6-9-times-tables/</a></p>	<p>4MD–1 Multiply and divide whole numbers by 10 and 100 (keeping to whole number quotients); understand this as equivalent to making a number 10 or 100 times the size.</p> <p>4MD–2 Manipulate multiplication and division equations, and understand and apply the commutative property of multiplication.</p> <p>4MD–3 Understand and apply the distributive property of multiplication.</p> <p>4NF–3 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 100)</p> <p>2.10 Connecting multiplication and division, and the distributive law</p> <p>2.13 Calculation: multiplying and dividing by 10 or 100</p> <p>4NF–1 Recall multiplication and division facts up to <math>12 \times 12</math>, and recognise products in multiplication tables as multiples of the corresponding number.</p> <p>2.8 Times tables: 3, 6 and 9, and the relationship between them</p> <p>2.9 Times tables: 7 and patterns within/across times tables</p> <p><a href="#">White Rose – Multiplication and division unit</a></p>
<p>5 (2 weeks)</p>	<p><b>7 times tables and patterns</b></p>	<ol style="list-style-type: none"> <li>1) Pupils represent counting in sevens as the 7 times table</li> <li>2) Pupils explain the relationship between adjacent multiples of seven</li> <li>3) Pupils use their knowledge of the 7 times table to solve problems</li> <li>4) Pupils identify patterns of odd and even numbers in the times tables</li> <li>5) Pupils represent a square number</li> <li>6) Pupils use knowledge of divisibility rules to solve problems</li> </ol> <p><a href="https://www.ncetm.org.uk/classroom-resources/cp-year-4-unit-5-7-times-table-and-patterns/">https://www.ncetm.org.uk/classroom-resources/cp-year-4-unit-5-7-times-table-and-patterns/</a></p>	

6	<b>Understanding and manipulating the multiplicative relationships</b>	<ol style="list-style-type: none"> <li>1) Pupils explain what each factor represents in a multiplication equation</li> <li>2) Pupils explain how each part of a multiplication and division equation relates to a story</li> <li>3) Pupils explain where zero can be part of a multiplication or division expression and the impact it has</li> <li>4) Pupils partition one of the factors in a multiplication equation in different ways using representations (I)</li> <li>5) Pupils partition one of the factors in a multiplication equation in different ways using representations (II)</li> <li>6) Pupils explain which is the most efficient factor to partition to solve a multiplication problem</li> <li>7) Pupils use knowledge of distributive law to solve two part addition and subtraction problems, efficiently</li> <li>8) Pupils use knowledge of distributive law to calculate products beyond known times tables facts</li> <li>9) Pupils explain the relationship between multiplying a number by 10 and multiples of 10</li> <li>10) Pupils explain why a zero can be placed after the final digit of a single-digit number when we multiply it by 10</li> <li>11) Pupils explain why a zero can be placed after the final digit of a two-digit number when we multiply it by 10</li> <li>12) Pupils explain why the final digit zero can be removed from a two-digit multiple of 10, when we divide by 10</li> <li>13) Pupils explain why the final digit zero can be removed from a three-digit multiple of 10, when we divide by 10</li> <li>14) Pupils explain the relationship between multiplying a number by 100 and multiples of 100</li> <li>15) Pupils explain why two zeros can be placed after the final digit of a single-digit number when we multiply it by 100</li> <li>16) Pupils explain why two zeros can be placed after the final digit of a two-digit number when we multiply it by 100</li> <li>17) Pupils explain why the last two zeros can be removed from a three-digit multiple of 100 when we divide it by 100</li> <li>18) Pupils explain why the last two zeros can be removed from a four-digit multiple of 100 when we divide it by 100</li> <li>19) Pupils use knowledge of the composition of 100 to multiply by 100 in different ways</li> <li>20) Pupils use knowledge of the composition of 100 to divide by 100 in different ways</li> <li>21) Pupils explain how making a factor 10 times the size affects the product</li> <li>22) Pupils explain how making the dividend 10 times the size affects the quotient</li> <li>23) Pupils explain how making a factor 100 times the size affects the product</li> <li>24) Pupils explain how making the dividend 100 times the size affects the quotient</li> <li>25) Pupils scale known multiplication facts by 100</li> <li>26) Pupils scale division derived from multiplication facts by 100</li> </ol>
